

Aquatic Plant Food+

Encourages healthy plant growth whilst controlling algae

Aquatic plants, particularly those growing in small water features, can be starved of the nutrients required for healthy growth and vibrant blooms. EcoPond Aquatic Plant Food+ contains all the nutrients vital to aquatic plants, plus extract of barley straw to help suppress blanket weed, algae and green water.

Benefits of Aquatic Plant Food +:

- Dual action formula contains nutrients to enhance the growth of large plants plus extract of barley straw to control algae growth
- Dosage can be adjusted to suit individual ponds or water features
- Clean, simple and easy to use.

Dosage: 50ml per 1000 litres (220 gallons) initial dose
20ml weekly thereafter (or 10 ml weekly in small water features)

Aquatic Plant Food + is formulated from a high quality blend of nutrients. No herbicides or pesticides are used in the formulation.

Additional information:

- Natural products sometimes work less quickly than available chemical products but offer a safer solution
- UV pond units can enhance the effect of the product
- Used by professional aquatic plant growers
- Using more than the recommended dose will not cause any harm

See reverse of sheet for Dosing Information and Frequently Asked Questions about EcoPond Aquatic Plant Food+.

Frequently Asked Questions:

How do I use Aquatic Plant Food Plus?

We recommend dosing 50 ml per 1,000 litres (220 gallons) as an initial dose followed by 20mls per week throughout the growing season. In small water features reduce the weekly dosage to 10 ml. This ensures that a background level is maintained within the pond or water feature so that it continues to work effectively as an algae control.

Please note, the above dosages are given as a guideline, as all ponds and pond plants are different and respond differently to treatment. Aquatic Plant Food Plus is a totally natural product, so it may take a few weeks before you see the full effect on green water, or blanketweed.

How do I dose it into my pond?

It is best added near to a re-circulating system, or pond pump, to ensure it is well mixed, but otherwise, it can simply be sprinkled across the surface of the water, ensuring that some is added in close proximity to the aquatic plants. It is supplied in a bottle with a built-in measuring chamber, so it is easy to measure the dose required. Simply remove the cap on the measuring chamber and gently squeeze the bottle to fill the chamber to the required level.

How much do I need?

One 250 ml bottle will treat up to 4,500 litres (1,000 gallons) of water.

What are the benefits of using Aquatic Plant Food Plus?

Its regular use will help control blanket weed algae & green water and give your pond plants and lilies the extra nutrients they need for strong and healthy growth. As it is totally natural and safe to use you can rest assured that precious fish or plants will not be affected by it.

Is there a situation where it cannot be used?

No, it is safe to use in even the most sensitive environments.

What happens if I add more than recommended?

Don't worry. It is a totally natural product and no harm is done by adding too much.
