

Water Butt Fresh

Prevents odours and improves stored water quality.

AquaHydrotech Water Butt Fresh is an environmentally friendly product which reduces the organic matter build up that can lead to unpleasant odours and the growth of algae in water butts and tanks. It is suitable for use in rainwater or re-cycled water and will not harm wildlife.

Benefits of Water Butt Fresh:

- Prevents unpleasant odours and algae growth
- Neutralises the potentially damaging effects of soap residue in re-cycled water so that it can be used to irrigate ornamental plants and lawns.
- Clean, simple and easy to use

Dosage: Rainwater: 25 ml per 100 litres (22 gallons) weekly
Re-cycled water: 50 ml per 100 litres (22 gallons) weekly

No herbicides or pesticides are introduced during the production process.

Additional information:

- Product should be stored in a cool place out of direct sunlight.
- Other products on the market may only stimulate existing micro-organisms rather than adding to the number present and so will not work as quickly or effectively as AquaHydrotech Water Butt Fresh.

See reverse of sheet for Frequently Asked Questions about Water Butt Fresh.

Frequently Asked Questions:

What is Water Butt Fresh?

Water Butt Fresh is a liquid product containing naturally occurring micro-organisms.

What does Water Butt Fresh do?

It digests the organic matter and reduces harmful bacteria that can cause unpleasant odours and the growth of algae in water butts.

How do I use it?

We recommend dosing 25 ml of Water Butt Fresh per 100 litres weekly in rainwater, or 50 ml per 100 litres weekly in recycled water. This ensures a background level is maintained within the water butt to ensure that it works effectively.

What are the benefits of using Water Butt Fresh?

It helps to keep stored rainwater fresh and neutralises the potentially damaging effects of soap residue in recycled water.

Can I put treated water onto the vegetable garden?

Treated rainwater is safe to use in any part of the garden. However, it is recommended that grey water is only used on ornamental plants and lawns, whether treated with Water Butt Fresh or not.

Is there anything that stops AquaHydrotech Water Butt Fresh from working?

Water Butt Fresh works well under most conditions.

How much do I need?

One 500 ml bottle will treat up to 2000 litres of rainwater or 1000 litres of recycled water.

How do I dose it?

It is supplied in a bottle with a built-in measuring chamber, so it is easy to apply the correct dose.

What happens if I add more than the recommended dose?

Don't worry. It is a totally natural product and no harm can be done by adding too much.
